Done:
- Garden Creation Feature fully implemented
- Volunteer Sign Up form connected to Mongo
- Went over all of the code and made sure there was consistent UI/UX that addressed Morville's Honeycomb and other essential UI/UX components
- Added Aria Attributes (will integrate after the rest is done so there are no conflicts)
- More UA stuff done on the branch. PR created that is not to be merged
    - Debugging required to import stuff to the frontend.

Planning Stuffs:
- Meeting moved to 5:20, so Ishneet's project is done + Johnny gets additional time on UA.
- Planning for a Sunday meeting. Possibly in person. Monday meeting will still happen.

TODO:
- User authentication(JOHNNY)
    - TARGET: tonight. If not, latest by: Sat midday
- Profile Page (HEMAN)
    - Add PUT request to the button so that the name and desc change.
- ui/ux components
    - Header needs to change when signed in (ISHNEET)
    - Hide the garden list based on role on the profile page (ISHNEET)
    - Garden list should only have the gardens owned by the signed in user. (ISHNEET)
    - Hide the garden creation feature on the map page. (HEMAN)
    - Forum page posts need to have the signed in user's name on the posts (JOHNNY)
- Once UA is done for (HEMAN):
    - Adding in user fields for Map & VSU once UA is complete. Two POST endpoints to be edited
    - On the profile page, two GET endpoints to be made. One for signed up volunteering events. The other for a list of gardens owned
    - The Garden Owner Role must be able to change name and desc of their gardens. One PUT endpoint to be made
- Monday Night Stuff
    - Aria attributes and UI will be integrated Mon (ISHNEET)
    - Minification on Monday night (ISHNEET)
    - Slides by Monday (ISHNEET)
    - Pull to VM and rigorously test on Monday night (HEMAN & JOHNNY)
    - Make README good (ALL)
